

# 7 Reasons to Choose TSUN Micro Inverter

**Micro Inverter  
for One Solar Panel**  
TSOL-M350  
TSOL-M400

**Micro Inverter  
2-in-1**  
TSOL-M800

**Micro Inverter  
4-in-1**  
TSOL-M1600

## 1 MORE CERTIFICATIONS, MORE MARKETS

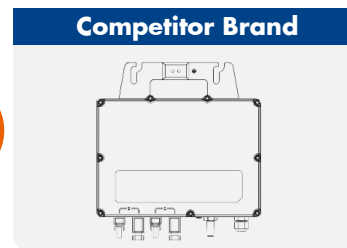

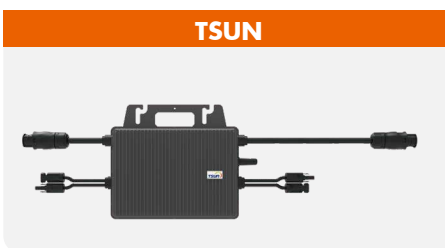

TSUN	
STANDARD:	
CE-LVD	CSA-C 22.2
EN 50549-1 (new)	VDE 0126:2013
IEC 62116/61683/61727	CEI 0-21:2019 (new)
AS/NZS 4777.2:2015	VDE 4105:2018 (new)
INMETRO ABNT NMR 16149/16150	UL 1741.....

Competitor Brand
STANDARD:
CE-LVD
VDE 4105:2011
EN 50438

More certifications, meet the new requirements of different countries.

## 2 HIGHER INPUT&OUTPUT, MORE ENERGY

Model	TSOL-M800	XXX600
Recommended Input Power (W)	2 * 280~440	2 * 250~375
Max. Input Voltage (V)	60	55
Max. Continuous Output Power (W)	700	600

Higher input and output, suitable for higher-output solar panels, more energy would be available for customers.

3

**MORE MODELS,  
MORE CHOICES**

**TSUN**

Four models of micro inverter, more choices for project designing.

VS

**Competitor Brand**

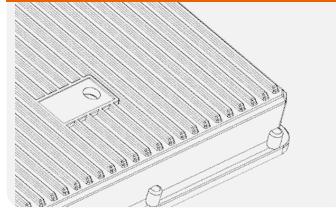

Micro inverter only for one solar panel.

4

**BETTER HEAT DISSIPATION,  
LONGER MTBF**

**TSUN**

Radiating fin design, better heat dissipation. Lower temperature will extend the service life of key components and make a longer MTBF of micro inverter.

VS

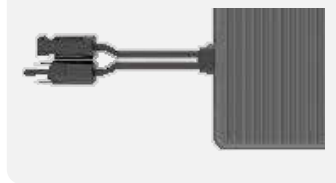

**Competitor Brand**

5

**BUILD-IN DC CABLES,  
EASIER CONNECTION**

**TSUN**

Build-in dc cables, less damage rate, better for the connection of solar panels. More convenient for the installer.

VS

**Competitor Brand**

6

**BUILD-IN AC CABLES,  
SIMPLIFIED ACCESSORIES**

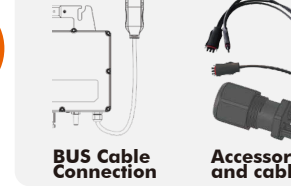

**TSUN**

Build-in AC cables with two little accessories, plug & play design, easier for installation.

VS

**Competitor Brand**

Installer should carry more cables and cut cables while installing. More complicated for the installation.

7

**MORE SOLUTIONS,  
MORE CO-OPERATION**

**TSUN**

**AC Module Solution & Easy Solar Kit Solution**

Except the standard AC module solution, TSUNESS provide a easy solar kit solution. Contact us for more information.

VS

**Competitor Brand**

**Only AC Module Solution**
